CAUTION

-  Use the sewing machine in an area which is free from sources of strong electrical noise such as high-frequency welders. Sources of strong electrical noise may cause problems with correct operation.
-  Any fluctuations in the power supply voltage should be within $\pm 10\%$ of the rated voltage for the machine. Voltage fluctuations which are greater than this may cause problems with correct operation.
-  The power supply capacity should be greater than the requirements for the sewing machine's electrical consumption.
-  The ambient temperature should be within the range of 5°C - 35°C during use. Temperatures which are lower or higher than this may cause problems with correct operation.
-  Machine installation should only be carried out by a qualified technician.
-  Contact dealer or a qualified electrician for any electrical work that may need to be done.
-  The sewing machine weighs approximately 38kg. The installation should be carried out by two or more people.
-  Do not connect the power cord until installation is complete. The machine may operate if the treadle is depressed by mistake, which could result in injury.
-  Be sure to connect the ground. If the ground connection is not secure, you run a high risk of receiving a serious electric shock, and problems with correct operation may also occur.
-  All cords should be secured at least 25mm away from any moving parts. Furthermore, do not excessively bend the cords or secure them too firmly with staples, otherwise there is the danger that fire or electric shocks could occur.
-  Be sure to wear protective goggles when using the machine. If goggles are not worn, there is the danger that if a needle breaks, parts of the broken needle may enter your eyes and injury may result.
-  Turn off the power switch at the following times. The motor will keep turning even after the power is switched off as a result of the motor's inertia. Wait until the motor stops fully before starting work. The machine may operate if the treadle is depressed by mistake, which could result in injury.
 - When threading the needle
 - When replacing the bobbin and needle
 - When not using the machine and when leaving the machine unattended
-  The relative humidity should be within the range of 45%-85% during use, and no dew formation should occur in any devices. Excessively dry or humid environments and dew formation may cause problems with correct operation.
-  Avoid exposure to direct sunlight during use. Exposure to direct sunlight may cause problems with correct operation.
-  In the event of an electrical storm, turn off the power and disconnect the power cord from the wall outlet. Lightning may cause problems with correct operation.
-  If using a work table which has casters, the casters should be secured in such a way so that they cannot move.
-  Use both hands to hold the machine head when tilting it back or returning it to its original position. If only one hand is used, the weight of the machine head may cause your hand to slip, and your hand may get caught.
-  Be sure to wear protective goggles and gloves when handling the lubricating oil and grease, so that they do not get into your eyes or onto your skin, otherwise inflammation can result. Furthermore, do not drink the oil or eat the grease under any circumstances, as they can cause vomiting and diarrhea. Keep the oil out of the reach of children.
-  Attach all safety devices before using the sewing machine. If the machine is used without these devices attached, injury may result.
-  Do not touch any of the moving parts or press any objects against the machine while sewing, as this may result in personal injury or damage to the machine.
-  If an error occurs in machine, or if abnormal noises or smells are noticed, immediately turn off the power switch. Then contact your dealer or a qualified technician.
-  If the machine develops a problem, contact your dealer or a qualified technician.
-  This sewing machine should only be used by operators who have received the necessary training in safe use beforehand.
-  The sewing machine should not be used for any applications other than sewing.

NAMES OF MAJOR PARTS

01. NEEDLE PLATE

02. FACE PLATE

03. THREAD TAKE-UP LEVER COVER

04. OIL WINDOW

05. COTTON STAND ASSEMBLY

06. PULLEY

07. HANDWHEEL

08. INDICATING BOARD

09. RUBBER HINGE ASSY

10. REVERSE LEVER

MACHINE SPECIFICATIONS

MODEL	FOZ 512 / 513 / 514	FOZ 522H / 523H / 524H
ITEM		
SPEED	1800 SPM	1800 SPM
ZIGZAG WIDTH	7 MM	7 MM
NEEDLE TYPE	DP X 5	DP X 17
THREAD TAKE-UP CAPACITY	73	73
NEEDLE BAR CAPACITY	34	34
PRESSER FOOT OPERATING AMOUNT		3-7 MM
PRESSER FOOT LIFT	7 MM	7 MM
MATERIALS	LIGHT / MEDIUM	MEDIUM / HEAVY

INSTALLATION

1. SEWING MACHINE BODY (FIG. 1)

APPLY SCREW (1) TO MOUNT SEWING MACHINE BODY AND PLATE.

2. BELT COVER C (FIG. 1)

APPLY SCREW (3) TO TIGHTEN THE BELT COVER C (2) TO THE MACHINE COVER.

3. BELT COVER D (FIG.1)

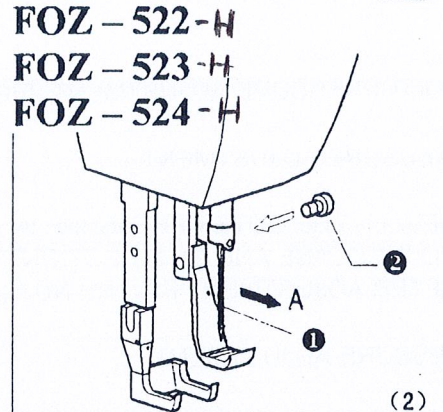

APPLY SCREW (5) & (7) TO TIGHTEN BELT COVER D (6) TO MACHINECOVER AND PLATE SEPERATLY.THEN APPLY SCREW (4) TO TIGHTEN BELT COVER C (2) AND BELT COVER D (6).

ADJUSTMENT

1. INSTALLING THE NEEDLE (FIG. 2)

AS FIGURE (2) SHOWN ROTATE HANDWHEEL TO MAKE NEEDLE BAR RISE TO THE MAXIMUM HEIGHT LOOSEN SCREW (2) ,PLUG NEEDLE (1) TO THE TOP, NEEDLE GROOVE SIDE FACE TO (A),THEN FASTEN SCREW (2).

2. CHANGING THE BOBBIN (FIG. 3)

PULL THE CYLINDER COVER (1), OPEN DE BOBBIN CASE THEN TAKE OUT THE BOBBIN CASE. INSTALL THE BOBBIN (3) INTO THE BOBBIN CASE (2) SNAP BOBBIN CASE INTO THE SHUTTLE AND CLOSE CYLINDER COVER.

3. WINDING THE LOWER THREAD (FIG. 4)

AS FIGURE (4) SHOWN, PLACE BOBBIN ON THE BOBBINWINDER SHAFT,CONNECT LOWER THREAD (1),MOVE HANDEL OF THE WINDING SHAFT (3) TO SNAP THE WHEEL TO THE BELT (2) AND ROTATE IT 80 % OF THE WINDING AMOUNT OF THE BOBBIN (4).

4. THREADING THE UPPER THREAD AND ADJUSTMENT (FIG. 5)

1) THREADING THE UPPER THREAD

INSERT THE UPPER THREAD (1) AS FIGURE SHOWN.

2) FACE LINE TENSION ADJUSTMENT

ROTATE CLIPPER (2) THE UPPER LINE TENSION IN DIRECTION (X) TO INCREASE AND (Y) DIRECTION TO DECREASE.

5. PRESSER FOOT PRESSURE ADJUSTMENT (FIG. 6)

1) OUTER PRESSURE ADJUSTMENT

ROTATE SCREW (1), THE OUTER PRESSURE IN (A) DIRECTION TO INCREASE AND (B) DIRECTION TO DECREASE. AFTER ADJUSTMENT FIX THE NUT (2)

2) INNER PRESSURE ADJUSTMENT

ROTATE SCREW (3), THE INNER PRESSURE IN (C) DIRECTION TO INCREASE AND (D) DIRECTION TO DECREASE. AFTER ADJUSTMENT FIX THE NUT (4)

6. NEEDLE PITCH ADJUSTMENT (FIG. 7)

AS FIGURE 7 SHOWN, ADJUST THE POSITION OF REVERSE LEVER (1) UNTIL IT'S RAISED AS DESIRED, THEN ROTATE THE ADJUSTMENT SCREW (2) TO TIGHTEN THE REVERSE LEVER.

7. FEED DOG HEIGHT ADJUSTMENT (FIG. 8)

APPLY SCREWDRIVER TO ROTATE ECCENTRIC SHAFT (1) IN ORDER TO ADJUST THE HEIGHT. ROTATE THE HANDWHEEL WHEN THE FEED DOG RISE TO THE MAXIMUM HEIGHT THE DISTANCE BETWEEN NEEDLE PLATE FACE AND THE TOP OF THE FEED DOG NEED TO BE 1,0 - 1,2 MM.

8. ZIGZAG WIDTH ADJUSTMENT (FIG. 9)

1) MACRO ADJUSTMENT.

THE SWING INDICATOR (2) INDICATE THE WIDTH NUMBER IN MM. ROTATE THE DIAL WHEEL TO ADJUST THE ZIGZAG WIDTH. DIAL IN (A) DIRECTION DECREASE AND (B) DIRECTION INCREASE.

2) MICRO ADJUSTING.

OPEN THE RUBBER CORK (3) APPLY SCREWDRIVER TO ROTATE ECCENTRIC BAR (4) TO ADJUST ZIGZAG WIDTH.

TROUBLESHOOT

NO	TROUBLE	WHAT TO DO WHEN	TROUBLE CARRSE	CORRECTIVE MEASURES
1	BREAKING NEEDLE	Diraction and height of needle	Wrong drection of upper needle	Correct direction from high to maximun high
		Needle	Bend needle	Change needle
		Feed dog travel	Mismatch of needle bar movement feed dog travel	Ajust travel of feed dog
		Needle bar rising	Wrong travel of needle and shuttle	Ajust travll of needle and shuttle
		Needle bar height	Wrong travel of needle and shuttle	Ajust travll of needle and shuttle
		Main distance between needle and shuttle	Wrong travel of needle and shuttle	Ajust travll of needle and shuttle
2	BREAKING THREAD	Ways of threading	Improper threading	Correct threading
		Needle	Bent needle or broken needle tip	Change needle
		Diraction and height of needle	Upper needle problem	Correct upper needle
		Upper thread tension	Upper thread tension too strong	Ajust upper thread tension
		Lower thread tension	Lower thread tension too strong	Ajust lower thread tension
		Thread take-up spring rate	Rate too big	Ajust spring rate
		Thread take-up spring tension	Thread take-up spring tension too weak	Ajust thread take-up spring tension
3	THREAD PROBLEM	Thread tension	Shuttle and upper thread tension problem	Adjust shuttle and upper thread tension
		Thread take-up spring tension	Thread take-up spring tension problem	Adjust thread take-up spring tension
		Presser foot	Presser foot too high	Ajust presser foot height
		Presser foot pressure	Presser foot presser too small	Ajust presser foot pressure
4	IRREGULAR STITCH	Feed dog height	Feed dog height too low	Ajust feed dog height
		Presser foot pressure	Presser foot pressure too small	Ajust presser foot pressure
		Bobbin	Scratch bobbin	Polish or change
		V belt tension	Belt tension too small	Ajust belt tension
5	PUCKERING OF FABRIC	Upper thread tension	Upper thread tension too strong	Ajust upper thread tension
		Lower upper thread tension	Lower thread tension too strong	Adjust lower and upper thread tension
		Thread take-up spring tension	Thread take-up spring tension too problem	Adjust thread take-up spring tension
		Thread take-up spring rate	Rate too big	Adjust thread take-up spring rate
		Presser foot pressure	Presser foot pressure too small	Ajust presser foot pressure
