G.S.C

GLOBAL SHOE CONSULTING

Over the last decade, Global has specialized itself in manufacturing sewing machines for almost any kind of shoe.

Apart from manufacturing Sewing Technologies, we see the growing demand for consulting assistance and training requirement to use the shoe technologies to its best.

To serve our customers and clients, we strongly believe that an end to end solution as part of customer service is required. Since 2 years under the roof of Global, we offer an independent service of shoe consultancy.

Global Shoe Consulting offers well founded, practical and easy to integrate advises / solutions for the needs in shoe production. Mainly for the closing areas together with our high qualified and experience partners we can offer the services for all areas from development, production and process planning.

Global Shoe Consulting assists especially on the following topics:

- Closing room optimization – analysis and optimizations
- Reorganisations of the production (from store – warehouse)
- Factory planning
- Coaching
- Operator training
- Methodical trainings
- Calculations – efficiency improvement
- Style wise calculations – process optimization

How to get started?

To get a better view on the current situation and circumstances, we prepared a questionnaire survey, which has to be filled in.

Based on this we get a first idea what might be or can be done and how long it will take to analyse the current circumstances. Depending on the size and the requirement fixed by the customer a first visit of the production facilities is required.

Here we will capture data and later a systematic assessment, evaluation of current state we are able to provide a consultancy.

A concept of different possibilities with budgeting, selection of optimal solutions.
Implementation and training of staff and operators etc.

OUR COMPANY

OUR MUSEUM

Welcome at **GLOBAL** Member of the imca group

As one of the largest distributors in the field of industrial sewing machines, imca/Global has a reputation to live up to. We believe that the quality of business is just as important as the quality of life and that's why we always give a customer the best possible service for our products.

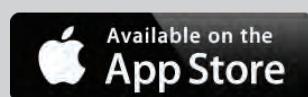

In our 12000 m² headquarters in Holland we keep a large stock of machines and parts as well and an unique museum, which shows the history of the sewing machine.
You are always welcome to visit us in our Holland headquaters.

GLOBAL selection content on your **tablet** or **phone**

The catalogue with the complete Global selection is available on the **App Store** (for iPad and iPhones) and the **Google play store** (for tablets and phones with android OS).

Please download the catalogue on your tablet or phone to support you when you want to buy or sell a Global selection item.

ORNAMENTAL STITCHING POSTBED MACHINE

LP 2974 OS

- Programmable ornamental stitching double needle postbed machine with large hooks, automatic thread trimmer, automatic back tacking and presser foot lift, which can carry out functional and decorative seams on shoes, suitcases, and bags. This machine is delivered with 16, single- and double-needle decorative stitch patterns, to sew 32 different patterns. Custom made patterns on request. Needle distance 3,2 mm.

- Máquina de poste, 2 agujas de puntada decorativa programable con ganchos grande, corta-hilos, remate y alza-prensatelas automáticas. Para trabajos decorativos en calzado, maletas y bolsos. La máquina se entrega con 16 patrones en 1 aguja y 2 agujas teniendo así 32 patrones distintos. A petición se entregar con patrones a medida. Distancia de agujas 3,2mm.

- Programmierbaren 2 Nadel Zierstich - Säulenmaschine (drehende Nadelstange) mit grossen Greifern, Fadenabschneider Verriegelung und Fusslüftung. Für funktionelle und Zierstiche an Schuhen, Koffern und Taschen. Die Maschine wird mit 32 Programmen geliefert, davon 16 2-Nadelprogramme und 16 1-Nadelprogramme. Auf Anfrage können wir auch Programme nach Wunsch erstellen. Nadelabstand: 3,2 mm

- Machine pilier 2 aiguilles à couture ornemental avec crochets de grandes capacités. Coupe fil, points d'arrêts et relevage du pied automatiques. Permet d'effectuer des coutures fonctionnelles et décoratives sur des chaussures, des valises et des sacs. Cette machine est livrée avec 16 motifs de points décoratifs simple et double-aiguille, pour coudre 32 modèles différents. Motif personnel réalisable sur demande. Écartement des aiguilles de 3,2 mm.

**SINGLE OR DOUBLE NEEDLE LOCKSTITCH POST BED
MACHINES FOR STITCHING OPERATIONS IN THE SHOE PRODUCTION**

LP 2971 LH-AUT

Single needle lockstitch post bed machine with wheel feed, needle feed, driven roller presser and large hook. The machine is equipped with automatic thread trimmer, automatic back tacking, and presser foot lift.

Máquina de columna, 1 aguja, arrastre por rueda, aguja y ruleta accionada. Equipada con garfi o grande, corta hilos, remate y alza-prensatelas manual y automáticos. Equipada para coser calzado en material ligero, medio y pesado.

Einnadel Säulemaschine mit Radtransport, Nadeltransport und oben angetriebenem Rollfuss. Ausgestattet mit grossem Greifer, Fadenabschneider, manuelle und automatischer Verriegelung und Presserfusslüftung. Diese Maschine ist geeignet für das Nähen von leichte, mittelschwere und schwere Schuhen.

Machine pilier avec entraînement par roué inférieur , aiguille et roué supérieur. Équipée avec crochet grande capacité, coupe fil, point d'arrêt manuel et automatique, relevage automatique du pied. La machine est prévue pour coudre les chaussures en matière légère, moyenne et lourde.

LP 2974 LH-AUT

Double needle lockstitch post bed machine with wheel feed, driven roller presser and large hooks. Standard needle gauge 2,0 mm. The machine is equipped with automatic thread trimmer, automatic back tacking, and presser foot lift. It's easy to convert this machine into a needle feed machine.

Máquina de columna doble aguja, arrastre por rueda y ruleta accionada. Equipada con garfi os grandes, corta hilos y remate y alza-prensatelas manual y automático. Distancia agujas estándar 2,0 mm. Se puede convertir facilmente en arrastre por aguja. Equipada para coser calzado material ligero, medio y pesado.

Zweinadel Säulemaschine mit Radtransport und oben angetriebenem Rollfuss. Ausgestattet mit grossem Greifer, Fadenabschneider, manuelle und automatischer Verriegelung und Presserfusslüftung. Standard Nadelabstand 2,0 mm. Diese Maschine ist einfach umzubauen nach Nadeltransport. Dieser Maschine ist geeignet für das Nähen von leichte, mittelschwere und schwere Schuhen.

Machine pilier 2 aiguilles avec entraînement par roué inférieur et supérieur. Équipée avec crochet grande capacité, coupe fil, point d'arrêt manuel et automatique, relevage automatique du pied. Ecartement standard des aiguilles de 2,0 mm . La machine est facilement transformable en version avec entraînement d'aiguille. La machine est prévue pour coudre les chaussures en matière légère, moyenne et lourde.

Global LP 8970 E SERIES HIGH SPEED POSTBED MACHINES

LP 8971 E-AUT

- High speed, single needle postbed machine, driven by HMC built-in mini servo motor, with top driven roller, wheel- and needle feed and standard hook. Machine equipped with thread trimming device, automatic back tack and presser foot lift (all electric).
- Máquina columna de alta velocidad de una aguja con mini motor HMC integrado, arrastre por ruleta accionada, agujas acompañantes y dientes circulares con retroceso y garfio normal. Equipada con corta-hilos, remate y alza-prensatelas (eléctrico).
- Maquina de coluna 1 agulha, motor integrado na cabeça HMC, transporte, roletos acionados, agulha acompanhante, lançadeira pequena. Equipada com corte linha, remate automático, levantamento calcador (tudo electrico).
- Hochgeschwindigkeits-, Einnadel Säulenmaschine mit eingebautem HMC mini servo motor, oben angetriebenem Rollfuß, Schiebrad- und Nadeltransport und mit standard Greifer. Die Maschine ist mit Fadenabschneider, automatischer Verriegelung und Presserfusslüftung ausgestattet (elektrisch).
- Machine pilier rapide à une aiguille, avec mini moteur servo intégré HMC. Marche arrière entraînement par griffe, aiguille et pied à roulette et crochet standard. La machine est équipée d'un dispositif coupe fil, des arrêts automatiques et relevage du pied presseur (électro-aimant).

LP 8974 E-AUT

- Double needle postbed machine, driven by HMC built-in mini servo motor, with wheel feed and top driven roller presser (no needle feed) and equipped with standard hooks, thread trimming device, automatic back tack and presser foot lift (all electric). Standard needle gauge 2,0 mm.
 - Máquina de dos agujas, columna con mini motor HMC integrado, con arrastre por diente y ruleta accionada (sin avance de aguja). Equipada con garfio y standard y con corta-hilos, remate y alza-prensatelas (eléctrico). Distancia de agujas 2,0 mm.
 - Maquina de coluna de 2 agujas, motor integrado na cabeça HMC, roletos acionados, (sem agulha acompanhante), lançadeira pequena. Equipada com corte linha, remate automático, levantamento calcador (tudo electrico)
 - Zweiadel Säulenmaschine mit eingebautem HMC mini servo motor, mit Rad-Untertransport und von oben angetriebenem Rollfuß (kein Nadeltransport). Ausgestattet mit normalem Greifern, Fadenabschneider, automatischer Verriegelung und Presserfusslüftung (elektrisch). Standard Nadelabstand ist 2,0 mm.
 - Machine pilier, 2 aiguilles, avec mini moteur servo intégré HMC, double entraînement par griffe et pied à roulette (pas d'entraînement d'aiguille) et crochet standard. La machine est équipée d'un dispositif coupe fil, des arrêts automatiques et relevage du pied presseur (électro-aimant).
- Écartement d'aiguille standard 2,0 mm.

for foxing operation

Dürkopp Adler 838 M-type Series

Postbed machines with bottom feed and driven roller presser foot are especially designed for all kinds of leather, textile materials and sport shoes, particularly for sewing thick threads. Efficient combination of feeding system guarantees stable stitch length and performance. Machines are equipped with electropneumatic seam backtacking and presser foot lift, enabling to sew thick materials easily.

• = Standard equipment

Special features

- Highest precision on stitch locking even during sewing speed changes
- Automatic bobbin winder with start up function
- Pneumatic switchable second thread tension for optimised sewing results
- Low noise and vibration
- The powerful and effective feeding system with bottom feed and driven roller presser guarantees excellent material feed when processing different material thicknesses
- Integrated second stitch length for quick stitch length change
- Electropneumatic presser foot lifting and backtacking enabling setting of high pressure on foot for sewing of strong materials
- Large vertical hook
- Simple needle guard adjustment by screw
- Device for controlling the difference between the upper and bottom feed from +10 % to -10 % (optional)
- Fast hook exchange
- Needle change without tools (single needle machines)
- New lubricating system with central oil tank and oil pump
- Roller presser setting by operator without tools (optional)
- Integrated built-in motor to save energy, easy maintenance
- Switch button for setting a reduced stitch, e.g. at material borders
- Fully integrated solenoids no compressed air required
- Integrated keypad with ergonomically arranged sensor key
- Easy maintenance and access, only a few tools needed

838-170522

Dürkopp Adler 838 M-type Series POSTBED SHOE PRODUCTION MACHINES

838-170522

- Single needle lockstitch postbed machine (right post) with driven roller presser and bottom feed, with electromagnetic thread trimmer, integrated 2-stitch length control, electro-pneumatic seam back tack and presser foot lift with large vertical two piece hook, safety clutch, presser foot height of 12 mm, stitch length up to 8 mm, maximum sewing speed 2.000 stitches/min.
- Máquina de poste (derecha de la aguja), 1 aguja con arrastre por rodilla superior y diente interior. Equipada con gancho grande sobre eje vertical de dos piezas, corta-hilos electro-magnético, 2 largos de puntada integrado, remate y alza-prensatelas neumático. Recorrido alza-prensatelas 12 mm. Máxima velocidad 2.000 puntadas por minuto y largo de puntada hasta 8mm.
- Einnadel-Doppelsteppstich Säulenmaschine (rechtständige Säule) mit angetriebenem Rollfuß und Untertransport, mit elektromagnetischem Fadenabschneider, integrierter zweiter Stichlänge, elektropneumatischer Nahtverriegelung und Nähfußlüftung, mit großem zweiteiligen Vertikalgreifer, Sicherheitskopplung, einer Nähfußhöhe von 12 mm, einer Stichlänge von max 8 mm und einer max. Nägeschwindigkeit von 2000 Stichen/Min.
- Machine à coudre à colonne gauche, une aiguille, point noué, avec pied presseur à roulette motorisée et entraînement inférieur, avec coupe-fil électromagnétique, deuxième longueur de points intégrée, dispositif de point arrière et lève-pied électropneumatiques, crochet vertical surdimensionné en deux parties, avec accouplement de sécurité, hauteur de levée pied de 12 mm, longueur de point jusqu'à 8 mm et vitesse max. de couture de 2000 points/min.

838-270522

- Double needle lockstitch postbed machine with driven roller presser and bottom feed, with electromagnetic thread trimmer, integrated 2-stitch length, electro-pneumatic seam lift back tacking and presser foot, with large vertical two piece hooks, safety clutch, presser foot height of 12 mm, stitch length up to 8 mm, max. sewing speed 2.000 stitches/min.
- Máquina de poste (derecha de la aguja), 2 agujas con arrastre por rodilla superior y diente interior. Equipada con gancho grande sobre eje vertical de dos piezas, corta-hilos electro-magnético, 2 largos de puntada integrado, remate y alza-prensatelas neumático. Recorrido alza-prensatelas 12 mm. Máxima velocidad 2.000 puntadas por minuto y largo de puntada hasta 8mm.
- Zweinadel-Doppelsteppstich Säulenmaschine mit angetriebenem Rollfuß und Untertransport, mit elektromagnetischem Fadenabschneider, integrierter zweiter Stichlänge, elektropneumatischer Nahtverriegelung und Nähfußlüftung, mit großen zweiteiligen Vertikalgreifern, Sicherheitskopplung, einer Nähfußhöhe von 12 mm, einer Stichlänge von max 8 mm und einer max. Nägeschwindigkeit von 2000 Stichen/Min.
- Machine à coudre, deux aiguilles, point noué, avec pied presseur à roulette motorisée et entraînement inférieur, avec coupe-fil électromagnétique, deuxième longueur de points intégrée, dispositif de point arrière et lève-pied électropneumatiques, crochets verticaux surdimensionnés en deux parties, avec accouplement de sécurité, hauteur de levée pied de 12 mm, longueur de point jusqu'à 8 mm et vitesse max. de couture de 2000 points/min.

• = Standard equipment

Special features

- Small diameter of hook post (post dimensions are 170 x 43 x 49,2 mm) enables to use machine for difficult operations on small-sized shoes and other jobs
- Highest precision on stitch locking even during sewing speed changes
- Automatic bobbin winder with start up function
- Manual switchable second thread tension for optimized sewing results (884-150050)
- Low noise and vibration
- The powerful and effective feeding system with wheel feed, needle feed and driven roller presser guarantees excellent material feed when processing different material thicknesses
- Standard hook with 22 mm bobbin
- Simple needle guard adjustment by screw
- Device for controlling the difference between the upper and bottom feed from +10 % to -10 % (optional)
- Fast dismantling of hook
- Needle change without tools
- Lubricating system with central oil tank and oil pump
- Roller presser setting by operator without tools (optional)
- Integrated built-in motor to save energy, easy maintenance
- Switch button for setting a reduced stitch, e.g. at material borders and integrated keypad with ergonomically arranged sensor key (advanced functions optional for 884-150152)
- Fully integrated solenoids (884-150152), no compressed air required
- Integrated LED sewing light (optional)
- Easy maintenance and access, only a few tools needed

Dürkopp Adler 884 M-type Series POSTBED SHOE PRODUCTION MACHINES

884-150050

Single needle lockstitch, direct drive, post bed machine with wheel feed, needle feed and driven roller presser, for stitching operations in the shoe production with slim post. This post bed machine is perfectly suited for the production of small-sized shoe uppers.

Máquina poste de 1 aguja con avance de peine giratorio, aguja y ruleta accionada, de poste estrecha para operaciones en la producción del calzado. La máquina de poste se presta perfectamente para la producción del parte superior de calzado chico.

Einnadel, Direct Drive Säulenmaschine Mit angetriebenem Rollfuss Nadel – und Schiebradtransport, für Näharbeiten in der Schuhproduktion auf einer dünnen Säule. Die Maschine ist perfekt geeignet für Schaftproduktion in kleinen Größen und Kinderschuhe.

Machine pilier point noué 1 aiguille, moteur direct, avec entraînement par roue, entraînement par aiguille et par pied à roulette, pour opérations de couture en production chaussure avec pilier fin. Cette machine pilier est parfaitement adaptée pour la production de tige de chaussure de petites tailles.

884-150152

Same as 884-150050, but equipped with automatic thread trimmer, automatic backtacking, and presser foot lift.

Las mismas características que la 884-150050, pero con corta-hilos automático, remate automático y alza- prensatelas.

Baugleich mit 884-150050, aber mit automatischem Fadenabschneider, automatischer Verriegelung und Nähfußlüftung ausgestattet.

Identique au modèle 884-150050, mais avec coupe-fils automatique, d'un bridage automatique de la couture par arrêt et d'un relevage du pied presseur.

Special features

M-Type 888
for undertrimming

- Highest precision on stitch locking even during sewing speed changes
- Equipment for 4 different trimming margins
- Easy winding due to automatic bobbin winder with start up function
- Manual switchable second thread tension for optimised sewing results (ECO)
- Low noise and vibration

M-Type 888
The powerful and effective feeding system with wheel feed, needle feed and driven roller presser guarantees excellent material feed when processing different material thicknesses

- Increased productivity due to large vertical hook with high winding capacity
- Simple needle guard adjustment by screw

M-Type 888
Device for controlling the difference between the upper and bottom feed from +10 % to -10 %

- Fast hook exchange
- Needle change without tools (single needle machines)
- New lubricating system with central oil tank and oil pump

M-Type 888
With electro-pneumatic mechanism for disconnection of left or right needle

- Machine belongs to M-Type series having all advantages and features
- Independently disconnectable left/right needle
- Integrated 2nd stitch length and switchable thread tension
- Electro-pneumatic seam back-tacking and presser foot lift
- Ergonomical control elements

888-460522

888-167122

888- 356020

Dürkopp Adler 888 M-type Special Series POSTBED SHOE PRODUCTION MACHINES

888-356020

- Single needle lockstitch, post bed machine (left handed post) with large hook, lining trimmer and manual backtacking, with wheel feed, needle feed and top driven roller presser (also during backtacking), maximum stitch length 5 mm.
- Máquina de poste (izquierda de la aguja), 1 aguja con cuchilla de recortar, remate manual y arrastre por rodilla, peine circular y aguja (también en retroceso) con larga de puntada de 5mm.
- Einnadel-Doppelsteppstich Säulenmaschine (linksständige Säule) mit großem Greifer, Unterschneider und manueller Verriegelung, mit Schiebrad- und Nadeltransport und angetriebenem Rollfuß (auch während der Verriegelung), max. Stichlänge 5 mm.
- Machine à coudre à colonne gauche, une aiguille, point noué, avec crochet à grande capacité, recoupeur et arrêt de couture manuel, avec entraînement par roue et par aiguille et avec roulette motorisée (durant le point d'arrêt également), longueur maximale du point 5 mm.

888-356122

- Same as 888-356020, but with automatic thread trimmer, automatic back tack and presser foot lift.
- Mismas características que la 888-356020, pero con corta-hilos, remate y alza-prensatelas automáticos y función de reducción de puntada.
- Baugleich mit 888-356020, aber mit automatischem Fadenabschneider, automatischer Verriegelung und Nähfußlüftung ausgestattet.
- Identique au modèle 888-356020, mais avec coupe-fils automatique, d'un bridage automatique de la couture par arrêt et d'un releveur du pied presseur.

888-167122

- Single needle lockstitch, post bed machine (right handed post) with wheel feed, needle feed, top driven roller presser. Machine is equipped with electric thread trimmer, presser foot lift, automatic back tack, motor driven oblique knife and large hook.
- Máquina de poste (izquierda de la aguja), 1 aguja con arrastre por diente circular, aguja y ruleta accionada. La máquina esta equipada con corta-hilos, remate, alza-prensatelas electricos, recorte obliquo eléctrico y garfio grande.
- Einnadel-Doppelsteppstich Säulenmaschine (linksständige Säule) mit Schiebrad- und Nadeltransport und angetriebenem Rollfuß. Der Maschine ist mit automatischem Fadenabschneider, automatischer Verriegelung, Nähfußlüftung, Motor angetriebene "oblique" Messer und großem Greifer ausgestattet.
- Machine pilier à gauche 1 aiguille - haute vitesse - entraînement par pied à roulette, aiguille et griffe circulaire à mouvement intermittent. Equipée avec coupe-fils électrique, relevage de pied, arrêt automatiques, couteau raseur commandé par moteur indépendant et crochet grande capacité.

888-460522

- Double needle lockstitch post bed machine with large hooks, for a professional performance of sewing operations on shoes and different leather articles. To avoid crossed seams at the corners, machine is equipped with electro-pneumatic mechanism for disconnection of left or right needle.
- Máquina de poste de 2 agujas con gancho grande, de uso profesional en calzado y otros artículos de cuero. La máquina esta equipada con mecanismo neumático para desembragar la aguja izquierda o derecha, para evitar costuras cruzadas.
- Zweinadel-Doppelsteppstich-Säulenmaschine mit großem Greifer, eignet sich perfekt für einen professionellen Einsatz bei Näharbeiten an Schuhen und anderen Lederartikeln. Um Kreuznähte in den Ecken zu vermeiden ist die Maschine mit einem elektropneumatischen Mechanismus ausgestattet, der eine Abschaltung der linken oder rechten Nadel möglich macht.
- Machine à coudre à colonne, point noué, avec crochet à grande capacité, s'adapte à la perfection pour une mise en œuvre professionnelle dans le cadre des coutures sur chaussures et autres articles en cuir. Afin d'éviter un croisement des coutures dans les angles, cette machine est équipée d'un mécanisme électropneumatique permettant de désactiver l'une des aiguilles droite ou gauche.

L = Light weight material

M = Medium weight material

H = Heavy weight material

• = Standard equipment

Special features

- 6 subclasses with highly efficient equipment features
- Excellent stitch pattern, constant and tight stitch formation even during sewing speed changes
- Sewing start-up can be influenced by the movable needle plate inserts
- Automatic bobbin winder with winding starting aid
- Manually switchable second thread tension for optimised sewing results
- Low noise and vibration
- The powerful and effective feeding system with wheel feed, needle feed and driven roller presser guarantees excellent material feed when processing different material thicknesses
- Feeding wheel with cross grooving for minimized marks on the fabrics
- Extra large XXL vertical hook with bobbin thread capacity increased by 70%, enabling to reduce the number of bobbin changes significantly
- Feeding wheel covered by rubber, for mark-free sewing (optional)
- Hook replacement without dismantling of bobbin case
- Needle change without tools
- New lubricating system with central oil tank and oil pump
- Extra fine setting of roller presser position
- Integrated built-in motor to save energy and for easy maintenance
- "Reduced-stitch" device for setting a short stitch e.g. at material edges by using switch button
- Fully integrated solenoids, no compressed air required
- Integrated keypad with ergonomically arranged sensor key
- Easy maintenance and access, only a few tools needed

887-160020

Dürkopp Adler 887 M-type Series FLATBED SHOE PRODUCTION MACHINES

887-160020

- Single needle lockstitch flat bed machine with wheel feed, needle feed and driven roller presser and a maximum stitch length of 7 mm.
- Máquina de placa plana de doble pespunte y una aguja con transporte de rueda corrediza y de aguja, pata rodante accionada, longitud máxima de puntada 7 mm.
- Einnadel-Doppelsteppstich-Flachbettmaschine mit Schiebrad und Nadeltransport und angetriebenem Rollfuß, maximale Stichlänge 7 mm.
- Machine à coudre à base plate, une aiguille, point noué, pour piqûage des chaussures, avec entraînement par roué et par aiguille et avec pied à roulette entraîné, longueur maximale du point 7 mm.

887-160122

- Same as 887-160020, but equipped with automatic thread trimmer, automatic back tack, and presser foot lift.
- Las mismas características que la 887-160020, pero con corta-hilos automático, remate automático y alza-prensatelas.
- Baugleich mit 887-160020, aber mit automatischem Fadenabschneider, automatischer Verriegelung und Nähfußlüftung ausgestattet.
- Identique au modèle 887-160020, mais avec coupe-fils automatique, d'un bridage automatique de la couture par arrêt et d'un relevage du pied presseur.

887-160040

- Single needle lockstitch flat bed machine with wheel feed, needle feed and driven roller presser and a maximum stitch length of 7 mm. Machine is equipped with extra large XXL hook with bobbin thread capacity increased by 70%, enabling to reduce the number of bobbins changes significantly.
- Máquina de placa plana de doble pespunte y una aguja con transporte de rueda corrediza y de aguja, pata rodante accionada, longitud máxima de puntada 7 mm. La máquina está equipada con un garfio vertical extra grande XXL que aumenta la capacidad de hilo en un 70% y así se reduce considerablemente el número de cambios de bobinas.
- Einnadel-Doppelsteppstich-Flachbettmaschine mit Schiebrad und Nadeltransport und angetriebenem Rollfuß, maximale Stichlänge 7 mm. Die Maschine ist mit einem extra großen XXL Vertikalgreifer ausgestattet, der die Spulfadendekapazität um 70% steigert und somit die Anzahl an Spulwechseln erheblich reduziert.
- Machine à coudre à base plate, une aiguille, point noué, pour piqûage des chaussures, avec entraînement par roué et par aiguille et avec pied à roulette entraîné, longueur maximale du point 7 mm. La machine est munie d'un crochet vertical XXL surdimensionné qui hausse de 70% la capacité en fil de bobine et réduit du coup le nombre de changements de bobines.

887-160142

- Same as 887-160040, but equipped with automatic thread trimmer, automatic back tack, and presser foot lift.
- Las mismas características que la 887-160040, pero con corta-hilos automático, remate automático y alza-prensatelas.
- Baugleich mit 887-160040 aber mit automatischem Fadenabschneider, automatischer Verriegelung und Nähfußlüftung ausgestattet.
- Identique au modèle 887-160040, mais avec coupe-fils automatique, d'un bridage automatique de la couture par arrêt et d'un relevage du pied presseur.

887-260020

- Double needle lockstitch flat bed machine with wheel feed, needle feed and driven roller presser and a maximum stitch length of 5 mm. Standard needle gauge 2 mm.
- Máquina de placa plana de doble pespunte, de dos agujas con transporte de rueda corrediza y de aguja, pata rodante accionada, longitud máxima de puntada 5 mm. Distancia entre agujas estándar 2 mm.
- Zweinadel-Doppelsteppstich-Flachbettmaschine mit Schiebrad und Nadeltransport und angetriebenem Rollfuß, maximale Stichlänge 5 mm. Standard Nadelabstand ist 2 mm
- Machine à coudre à base plate, deux aiguilles, point noué, pour piqûage des chaussures, avec entraînement par roue et par aiguille et avec pied à roulette entraîné, longueur maximale du point 5 mm. Écartement d'aiguilles standard de 2 mm.

887-260122

- Same as 887-260020, but equipped with automatic thread trimmer, automatic back tack, and presser foot lift.
- Las mismas características que la 887-260020, pero con corta-hilos automático, remate automático y alza-prensatelas.
- Baugleich mit 887-260020, aber mit automatischem Fadenabschneider, automatischer Verriegelung und Nähfußlüftung ausgestattet.
- Identique au modèle 887-260020, mais avec coupe-fils automatique, d'un bridage automatique de la couture par arrêt et d'un relevage du pied presseur.

ZIG-ZAG SEWING MACHINE

ZZ 512

- Single needle, drop feed, flatbed, zig-zag sewing machine with fully automatic lubrication and horizontal axis rotary hook for sewing light to medium material. Stitch type: two point zig-zag (fig. 1).
- Máquina de una aguja zig-zag, arrastre por dientes con lubricación automática y gancho sobre eje horizontal. Para materiales ligeras y media pesadas. Tipo de puntada: zig-zag de dos puntadas. (Fig. 1).
- Einnadel, Zick-Zack Maschine mit Untertransport, vollautomatische Schmierung und Horizontalgreifer, für leichtes bis mittleres Material. Stichbild: 2-Stich Zick-Zack (Fig. 1).
- Machine zig-zag, 1 aiguille entraînement par griffe avec lubrification automatique et crochet sur axe horizontal pour la couture sur article léger à moyen. Type de point: zig-zag deux points (fig. 1).

ZZ 513

- Same as ZZ 512, but with three point zig-zag stitch type (fig. 2). This machine is no stock item, but can be ordered upon request.
- Las mismas características que la ZZ 512, pero con zig-zag de tres puntadas (Fig. 2). Esta máquina no es un artículo en stock, pero puede ser pedido a petición.
- Baugleich mit ZZ 512, jedoch mit 3-Stich Zick-Zack (Fig. 2). Nicht ab Lager lieferbar, nur auf Anfrage.
- Identique à la ZZ 512, mais avec point zig-zag trois points (fig. 2). Machine non stockée, livrable sur commande.

ZZ 514

- Same as ZZ 512, but with four point zig-zag stitch type (fig. 3). This machine is no stock item, but can be ordered upon request.
- Las mismas características que la ZZ 512, pero con zig-zag de cuatro puntadas (Fig. 3). Esta máquina no es un artículo en stock, pero puede ser pedido a petición.
- Baugleich mit ZZ 512, jedoch mit 4-Stich Zick-Zack (Fig. 3). Nicht ab Lager lieferbar, nur auf Anfrage.
- Identique à la ZZ 512, mais avec point zig-zag quatre points (fig. 3). Machine non stockée, livrable sur commande.

ZZ 512 H

- Single needle, upper- and lower feed, flatbed, zig-zag sewing machine with fully automatic lubrication and horizontal axis rotary hook for sewing medium material, such as leather, canvas, etc. Stitch type: two point zig-zag (fig. 2). This machine is no stock item, but can be ordered upon request.
- Máquina de una aguja zig-zag, arrastre por dientes y pata con lubricación automática y gancho sobre eje horizontal. Para materiales media pesadas, como cuero, lona etc. Tipo de puntada: zig-zag de 2 puntadas. (Fig. 2). Esta máquina no es un artículo en stock, pero puede ser pedido a petición.
- Einnadel, Zick-Zack Maschine mit Unter-, Nadel- und alternierendem Obertransport, vollautomatische Schmierung und Horizontalgreifer, für mittleres Material. Stichbild: 2-Stich Zick-Zack (Fig. 2). Nicht ab Lager lieferbar, nur auf Anfrage.
- Machine zig-zag une aiguille avec entraînement supérieur et inférieur, lubrification automatique et crochet sur axe horizontal pour couture sur article moyen, comme le cuir, ou la toile etc. Type de point: zig-zag deux points (fig. 2). Machine non stockée, livrable sur commande.

ZZ 513 H

- Same as ZZ 512 H, but with three point zig-zag stitch type (fig. 1).
- Las mismas características que la ZZ 512 H, pero con zig-zag de tres puntadas (Fig. 1).
- Baugleich mit ZZ 512 H, jedoch mit 3-Stich Zick-Zack (Fig. 1).
- Identique à la ZZ 512 H, mais avec point zig-zag trois points (fig. 1).

ZZ 514 H

- Same as ZZ 512 H, but with four point zig-zag stitch type (fig. 3). This machine is no stock item, but can be ordered upon request.
- Las mismas características que la ZZ 512 H, pero con zig-zag de 4 puntadas (Fig. 3). Esta máquina no es un artículo en stock, pero puede ser pedido a petición.
- Baugleich mit ZZ 512 H, jedoch mit 4-Stich Zick-Zack (Fig. 3). Nicht ab Lager lieferbar, nur auf Anfrage.
- Identique à la ZZ 512 H, mais avec point zig-zag quatre points (fig. 3). Machine non stockée, livrable sur commande.

GATHERING MACHINE FOR SHOE UPPER

Single needle, gathering lockstitch machine, with large hook for shoe upper. The differential feed and variable top feed ensure accurate gathering. Mechanical gathering control: by operating the switch, at the needle bar end of the machine, which changes from flat sewing to gathering.

The machine will be supplied with Ho Hsing i-drive motor, automatic presser foot lifter, edge guide, tape guide and tape reel bracket. The machine is suitable for processing California style shoes, clogs and moccasins. To increase the gathering effect, a reinforcing tape is sewn on simultaneously and holds the gathering in place.

Máquina pespunte de embeber previo, de una aguja, gancho grande para el parte superior del zapato. El avance diferencial y el arrastre superior variable aseguran trabajo de embebido exacto. El control manual de embebido : manejando el nudillo al final de la barra de aguja con dos ajustes de embebido. La máquina es suministrada con motor Ho Hsing i-drive, alza-prensatelas, guía, guía de cinta y soporte para el rollo de cinta. La máquina es adecuado para el proceso del zapato estilo Californiano, zuecos y mocasines. Una cinta de refuerzo es cosido al mismo tiempo para incrementar el efecto de embebido y mantener el embebido en su sitio.

1 Nadel Doppelsteppstichmaschine mit großem Greifer zum vorkräuseln von Lederteilen mit Bändchen. Der mechanische Differential- Obertransport sorgt für ein gleichmäßiges Einkräuseln. Die Zuschaltung erfolgt über einen Knopf am Nähkopf. Durch die Bandführung wird die Kräuselwirkung verstärkt und die Form besser fixiert. Die Maschine ist ausgestattet mit einem Ho Hsing i drive Motor, automatischer Presserfußlüftung, Kantenführer, Bandhalter mit Bandbremse am Kopf und Bändchenführung im Nähfuß. Einsatzgebiet sind unter anderem die Schuhfertigung (Kalifornien Schuhe, Clogs und Mokassins), Polstermöbelindustrie , allgemeines vorkräuseln von Lederteile.

Machine une aiguille pour fronce en point noué , avec crochet grande capacité pour plateau de chaussures. L'entraînement différentiel supérieur réglable permet de réaliser des fronces de qualité. Contrôle de la valeur de fronce par contact près de la barre aiguille permettant d'alterner entre deux valeurs. La machine est livrée avec un moteur Ho Hsing « i-drive », relevage automatique du pied, guide bord, guide bande et support de bande de renfort. La machine est utilisée pour le montage California, les mocassins et sabots. Pour augmenter l'effet de fronce, une bande de renfort est cousue simultanément et maintien les fronces en place.

Máquina de uma agulha para franzir, com lançadeira grande. Equipada com diferencial de transporte para garantir um franzido óptimo. Sistema de franzir mecânico atuado através de joelheira. A máquina vem equipada com motor Ho Hsing I-drive , levantamento de calcador automático, guia lateral, guia para fita e suporte para o rolo de fita.

A máquina é adequada para fazer sapatos estilo Califórnia, mocassins. Para aumentar o efeito de franzido e o manter no mesmo sitio a máquina cose uma fita de reforço ao mesmo tempo.

STROBEL 141-23EV

SINGLE THREAD OVERSEAMING MACHINE FOR INSOLING

With this sturdy overseaming machine insoles are sewn to uppers. In relation to the conventional lasting method, the Strobel-method saves quite a lot of material. With this machine leather or textiles up to a thickness of 7 mm can be sewn. Thereby the gathering device helps to sew in fullness of the upper. Optional equipment (different feed and front cups) enables the machine to manufacture children shoes or very delicate material. Even kits for string-lasting (with strings up to 1,7 mm or up to 2,5 mm diameter) or for California-type shoes are offered.

Con esta fuerte máquina de sobrehilar se cosen plantillas interiores a los cortes de zapatos de cuero y textil de manera Strobel. Comparado con el método tradicional de montar y a la vez ahorrando bastante material. Se pueden coser materiales de hasta un grosor total de 7 mm. Al coser la plantilla al corte se frunce al mismo tiempo el material superior. Como equipo adicional se ofrecen diferentes platos de transporte principal y auxiliar para la fabricación de calzado infantile, de capelladas angostas o para materiales especialmente delicados, además dispositivos para el sistema „stringlasting“ (para cordones hasta 1,7 mm o 2,5 mm de diámetro) o para el sistema “California”.

Mit der robusten Überwendlichmaschine werden die Brandsohlen an Schuhfächer genäht. Diese Strobel-Methode bietet gegenüber der konventionellen Zwickmethode eine deutliche Materialersparnis. Mit dieser Maschine können Materialien bis zu einer Stärke von 7 mm verarbeitet werden. Dabei wird beim Einnähen der Zwischensohle das Obermaterial mit der Einhaltevorrichtung gerafft. Als Zusatzausstattung sind verschiedene Transport und Anpreßteller zur Verarbeitung von Kinderschuhen, schmalen Kappenbereichen oder besonders empfindlichen Materialien genauso wie Vorrichtungen für das string-lasting-Verfahren (für Kordeln bis zu 1,7 mm bzw. 2,5 mm Ø) oder für die California-Verarbeitung erhältlich.

Cette surjeteuse assemble semelle première et tige de chaussures. Cette méthode Strobel, compare à la méthode classique, permet d'économiser sensiblement du matériaux. Cette machine peut travailler du matériaux textile ou en cuir jusqu'à une épaisseur de 7 mm. Au début de l'opération, la couche supérieure du matériaux est fronée par le dispositif d'embu. En option, elle est livrable avec différentes coupelles de transport et d'avant(pour travailler les chaussures pour enfants, les zones minces de la partie supérieure de la chaussure et des matériaux particulièrement sensibles) et des dispositifs pour la méthode du string lasting (pour cordonnets de laçage jusqu'à 1,7 mm et 2,5 mm Ø) ou pour la méthode California.

STROBEL VTD 410 EV

SINGLE THREAD OVERSEAMING MACHINE FOR INSOLING

The heavy cupfeed model VTD 410 EV can stitch even penetration resistant Kevlar soles with a material thickness of 11mm - Even at high speed! A separate "direct" drive ensures that the feed & front cup work to the millimeter. In addition, the differential feed allows this versatile machine to build in an extra 48% of fullness in to the seam as required. This eliminates the pre-gathering-operation. Special equipment for the production of such seams at the "California-Style" will be delivered on request.

El modelo VTD 410 EV de platos ajustables de transporte de materiales pesadas, puede incluso coser las suelas Kevlar resistente a la penetración con un grosor de material de 11 mm. y "a alta velocidad". El avance directo y separado asegura que el arrastre & el plato frontal trabajan al milímetro. Además el arrastre diferencial permite a esta máquina versátil para construir en 48 % adicional de plenitud en la costura como se requiere, eliminando la fase de preparación. Equipamientos especiales para la producción de tipo de trabajo como "Estilo-California" serán atendidos a petición.

Die robuste VTD 410 EV vernäht selbst durch trittsichere Kevlarsohlen - und das mit hoher Geschwindigkeit bis zu einer Materialstärke von 11 mm. Der separaten Direktantrieb für Transport- und Anpressteller arbeitet auf den Millimeter genau. Dieser Differenzialtransport ermöglicht der VTD 410 EV eine exakte Weitenverteilung und das Einarbeiten von bis zu 48% Mehrweite. Dadurch kann das Vorraffen eingespart werden! Selbstverständlich erfüllen wir Ihnen Sonderwünsche, wie zum Beispiel die Ausstattung für die California-Verarbeitung.

La machine lourde avec entraînement cuvettes VTD 410 EV peut coudre des semelles en Kevlar avec une épaisseur de 11 mm, même à grande vitesse. Un entraînement séparé permet aux coupelles avant et arrière une précision du millimètre. Le différentiel permet un ajout de matière jusqu'à 48 %. Ceci permet d'éliminer l'opération de pré-fronçage. Des équipements spéciaux pour la production tel que le "Style Californien" sont livrable sur demande.

Global SM 7840 RL RIB LAYING MACHINE FOR GOODYEAR WELT

This machine attaches the rib to the sole by the use of heat and pressure. The rib circulates in a hot drum which preheats it while at the same time, by the use of a current of hot air, activates the rib and the glued area to achieve greater adhesion of the rib. An automatic cutting device cuts the rib in an exact, predetermined place, facilitating the following operations in the production process. Furthermore, thanks to its adjustable guide we can vary the distance of the rib from the edge of the sole, which is without doubt the best cement for conducting the following processes in the Goodyear production. The design of this machine enables the rib to be applied in either round and thin-toed shoes or cowboy boots. The variostop electronic motor ensures that the machine will always stop with the hammer in the up position so as to remove the shoe and insert the next sole.

Esta máquina coloca o lábio na palmilha através de calor e pressão. O lábio circula num tambor quente que ao mesmo tempo a pré-aquece, usando uma corrente de ar quente que ativa o lábio e a área colada para alcançar uma maior adesão. Um dispositivo de corte automático corta o lábio facilitando o processo de fabrico. Além disso, graças à sua guia ajustável, que pode variar a distância do lábio a partir da borda da palmilha. A construção desta máquina, permite aplicar o lábio em vários tipos de modelos de palmilhas (sapatos redondos, sapatos senhora).

A mesma vem equipada com motor eletrônico para permitir uma paragem eficaz e permitir que o martelo pare sempre na posição aberta, para facilmente remover a palmilha e inserir outra.

La máquina ata el cerquillo al plantilla usando calor y presión. El cerquillo circula dentro bidón, cual calienta el material y al mismo tiempo, con el uso de un corriente de aire caliente activa la área de la cola para adquirir mas adhesión del cerquillo. Un dispositivo de corte automático corta el cerquillo exacto en el sitio predeterminado, facilitando la siguiente operación en el proceso de producción. Además, gracias a las guías ajustables, podemos variar la distancia del cerquillo al orilla de la plantilla, cual es sin duda el mejor cemento para llevar a cabo los siguientes procesos en la producción de "Goodyear". El diseño de esta máquina permite de aplicar tanto calzado de punta redondo como en punta fino o botas vaquero. El motor electrónico vario-stop asegura que la máquina para con el martillo en posición arriba para quitar e insertar la plantilla siguiente.

POWER USE HEATER

500 watt – 220 volts

DAILY PRODUCTION

Approx: 100 pair / hour

Global SM 7860 ST STAPLING MACHINE FOR GOODYEAR WELT

This machine is used in Goodyear production, to tighten the cut to the last and fit it to the rib by using staples, which the machine itself produces from a roll of wire. The adjustable pincers, facilitate the tightening operation, pulling the leather and the lining against the rib while the machine nails the staples. As the wire is very thin, it does not complicate to make the welt stitching. This machine has been designed to solve the common problems of mechanical machines, by replacing the brake and clutch with a variable speed electronic motor.

Esta máquina é usada na produção de Goodyear para apertar o corte ao lábio da palmilha, usando agrafos que a própria máquina produz a partir do rolo de arame. As pinças ajustáveis facilitam a operação do aperto, puxando a pele e o forro contra o lábio enquanto a máquina coloca o agrafo. O arame é muito fino para facilitar a costura da vira. Esta máquina foi concebida para resolver os problemas comuns das máquinas mecânicas , para isso foi substituído o travão e a embraiagem mecânica por um motor eletrônico.

Esta máquina se emplea en la producción "Goodyear" para juntar el corte al forro y fijarlo al enfranque usando grapas, que la máquina misma produzca de un rollo de cable de acero. Las pinzas ajustables facilitan la operación de fijar, empujando cuero exterior y el forro contra el enfranque, mientras la máquina fija las grapas. Ya que el cable de acero es muy fino no complica hacer cosiendo la costura. La máquina esta diseñado para resolver los problemas común de las maquinas mecánicas, reemplazar el freno y el embrague por un motor electrónico de velocidad variable.

Global SM 7810 GW GOODYEAR WELT INSEAM STITCHING MACHINE

This Goodyear welt, inseam chainstitch sewing machine, sews the welt on the rib of footwear manufactured in the Goodyear system. It perforates the shoe with an awl and a needle and it is sewn absolutely firmly thanks to the adjustable tension of the thread. This machine may optionally be adapted with different guides in order to work with various types of welts.

La máquina de coser la cerquilla a la bota tipo "Goodyear welt" pone el cerco a la bota con puntada cadeneta para calzado con el sistema "Goodyear". La máquina perfora la bota con un punzón y una aguja y queda muy firme gracias a la tensiones del hilo ajustables. La máquina se puede adaptar opcionalmente con diferentes guías para poder trabajar en varios tipos de "welt".

Esta máquina executa a costura através de ponto de cadeia, da vira com a borda do sapato no sistema Goodyear. Perfura o sapato com um furador, e uma agulha, fazendo uma costura extremamente firme devido ao regulador de tensão de linha.

A mesma pode ser opcionalmente adaptada com guias diferentes, a fim de trabalhar com vários tipos de vira.

Global SM 7820 MC SHOE PRODUCTION MACHINE

Single needle lockstitch horn shoe sewing machine of the McKay type. The leather soles are stitched to each upper by using the Blake/McKay method for supreme comfort and flexibility. The upper is wrapped around the insole and attached between it and the outsole. A single stitch attaches everything together. The stitches are concealed by a channel in the outsole and pass through the outsole, upper, lining, and insole. Because it is a simpler construction than a Goodyear welt, it is also less expensive. This machine can also be used for resoling once the outsole is worn or damaged.

Máquina de cuero, 1-aguja de pespunte de calzado de tipo McKay. La suela de cuero esta cosido al parte superior usando el método Blake/McKay para una comodidad y flexibilidad supremo. La plantilla interior es envuelto por la parte superior y unido entre la plantilla y la suela exterior. Un solo pespunte une todas partes juntas. Los pespuntes se asientan en un canal de la suela exterior y pasan por a través de la suela exterior , parte superior del zapato, el forro y la plantilla interior. Por ser un construcción más simple que el "goodyear welt", también es menos costoso. También la máquina sirve para reponer una suela exterior cuando este gastado o dañado.

Máquina de 1 agulha com braço para coser sapatos tipo Blake. As solas de couro são cosidas ao corte usando o sistema Blake/Mckay para um conforto superior e flexibilidade. O corte é virado por baixo da palmilha, ficando entre a palmilha e a sola, sendo unido pelo ponto. Os pontos são cosidos num refendido na sola, passando pelo corte, palmilha e sola unindo tudo. Como é uma construção mais simples que o sistema Good-year, também fica mais barato. Esta máquina também pode ser usada para coser solas novas quando a sola original estiver danificada.

VINCO
SEWING

Two needle lockstitch machine driven by Mitsubishi-VINCO. direct drive PLK-G, shuttle hook and thread trimmer. This machine is modified to make it suitable for the shoe production industry.

The double colour device (i.e. DCT – Double Colour Technology), patented by VINCO, allows to stitch with 2 threads of different colours / thickness in one single sewing cycle. Thanks to the 2 split needle bars, it is possible to skip automatically from one needle to the other following the sewing pattern. With the user friendly touch screen panel, it is easy to make any pattern desired, it is also possible to purchase a software program to create the patterns on the PC or send a sketch to our design department and we will make the pattern for you and send it by e-mail. You can download it on a flash memory stick and upload it on the machine. It is possible to store 512 different patterns in the internal memory. Special clamps for your patterns are available on request.

Máquina de pespunte, 2-agujas impulsado por Mitsubishi-VINCO, direct - drive PLK-G, gancho de lanzadera y corta-hilos. La máquina ha sido adaptado para la producción de calzado. El dispositivo de dos colores (DCT – Double Colour Technology), patentado por VINCO, permite coser con 2 hilos de diferentes colores y grosor en un solo ciclo. Gracias a las dos barras de agujas divididas, es posible de saltarse automáticamente de una aguja a otra siguiendo un patrón de dibujo. Con el panel táctil de uso fácil es posible de hacer cualquier patrón y también puede adquirir un programa de software para crear los dibujos / patrones en un PC o enviar un dibujo a nuestro departamento de diseño y hacemos su patrón para mandar por e-mail. Puede guardar el dibujo / patrón en usb para recuperarlo en la máquina. Es posible de guardar 512 diferentes patrones en la memoria de la máquina. Abrazaderas especiales se puede suministrar a solicitud.

Maquina de 2 agulhas com motor incorporado produzido pela mitsubishi-VINCO, lançadeira de sino e corte linha. Esta maquina foi modificada para a industria do calçado. O sistema de trabalho com 2 cores (DCT-TECNOLOGIA DE 2 CORES) patenteada pela VINCO, permite coser com 2 linhas de cores e de espessuras diferentes num único ciclo de costura. Graças ao sistema de 2 varas de agulha independentes é possível passar de uma vara para outra e fazer o desenho estabelecido. É bastante fácil criar uma costura programada devido ao painel de fácil programação, sendo possível também o software para criar os programas no computador ou mandar um desenho para o nosso departamento de design e nos criarmos o programa de costura para si no qual será enviado por mail, depois pode descarregar num cartão de memoria e passa lo para a maquina. É possível armazenar até 512 programas diferentes na memoria interna. Estão disponíveis calcadores especias por encomenda mediante o vosso programa de costura.

Global BT 100 x 100 ELECTRONIC PATTERN SEWING MACHINE

GLOBAL BT 100 X 100

This programmable pattern sewing machine is suitable to sew medium / heavy materials with a sewing area of 100 x 100 mm. The height of presser foot lifter can be adjusted by a stepping motor.

Patterns are programmable on the userfriendly touch panel. The left and right clamp can be programmed to move down independently. The machine is delivered complete with table top, stand and a direct drive mini servo motor. Maximum machine speed 2400 spm. Optional available: roll-over clamp (not assembled).

Máquina de coser programable adecuada para coser materiales media-pesadas y pesadas con un área de 100 x 100 mm. La altura de la prensatelas programable con el motor paso a paso. Los dibujos son programable a través del panel táctil de uso fácil. La mordaza izquierda y derecha se puede bajar independientes. La máquina viene completa con tablero, estante y mini motor servo de acción directa. Máxima velocidad 2.400 p.p.m. Opcional pinza de vuelco.

Nähautomat für mittlere bis schwere Stoffe mit einem Nähfeld von 100 x 100mm. Der Fusshub ist schrittmotorgesteuert. Nähpogramme werden einfach auf dem Bedienerfreundlichen Touch Panel programmiert. Die und rechte und linke Klammer können jeweils separat programmiert werden. Die Maschine wird komplett geliefert mit Tischplatte, Gestell und Direct Drive Mini- Servomotor. Maximale Geschwindigkeit: 2400 SPM.

Automate de couture pour article moyen/lourd avec une surface de travail de 100 x 100 mm. La hauteur du pied presseur est réglable par moteur pas à pas. Les dessins sont programmables à l'aide de la tablette tactile conviviale. Demi pince gauche et droite pouvant être programmés pour descendre indépendamment. Machine livrée complète avec table, bâti et mini servo moteur. Vitesse maximum de 2400 pts/mn. En option pince avec fixation rotative (non monté).

GLOBAL BT 300 X 200 (available 07/2017)

Same as BT 100 X 100, but with a sewing area of 300 x 200 mm.

Las mismas características que la BT 100 X 100, pero equipada para área de 300 x 200 mm.

Baugleich mit BT 100 X 100, jedoch mit einem Nähfeld von 300 x 200mm.

Mitsubishi PLK-G2516 ELECTRONIC HEAVY DUTY PATTERN SEWING MACHINE

PLK-G2516 – YU

This computerized pattern stitching machine has been especially built by Mitsubishi for Global International company.

With this set up it is possible for small factories / production companies to make the first step to automated production for a reduced price and still benefit from the full options of the PLK system.

The standard PLK-G2516 is equipped with "revolving jigs" release system to give it the possibility to sew both left as right of vamp and toe cap in one operation for different models, thanks to the barcode reading system and jigs release system.

Esta máquina de pespunte computerizado ha sido especialmente construida por Mitsubishi para la compañía de Global International. Con esta configuración es posible para fabricas pequeñas o producciones reducidas hacer su primer paso de automatizar su producción a un precio reducido y al mismo tiempo beneficiarse de las opciones completas del sistema PLK. Estándar la PLK G2516 esta equipada con el sistema de cambio de bastidores, que da la opción de coser el parte frontal y la punta superior de izquierda y derecha en una operación para diferentes modelos, gracias al sistema de lectura de código de barras y el cambio de bastidores.

Dieser elektronische Nähautomat wurde von Mitsubishi speziell für Global International entwickelt. Mit dieser Maschine können kleinere Fabriken/Produktionsstätten die ersten Schritte Richtung Automatisierung machen und können, trotz sehr günstiger Preise, auf alle Optionen des PLK Systems zurückgreifen. Die Maschine ist mit einem doppelten Rahmen ausgerüstet den die Maschine automatisch in 2 Positionen aufnimmt/bzw. ablegt, um so die Möglichkeit zu haben sowohl den linken als auch den rechten Teil des Blattes, in einer Operation, über das Barcode-Lesesystem, mit der Blattaufnahme zu vernähen.

Cet automate de couture a été spécialement conçu par Mitsubishi pour la société Global International. Avec cette configuration, il est possible pour les petites usines / sociétés de production, de faire leur premier pas dans la production automatisée pour un prix réduit et de toujours bénéficier des options complètes du système PLK. La PLK-G2516 est équipée en standard avec système de libération par "gabarit tournant" pour lui donner la possibilité de coudre pour différents modèles l'empeigne et le bout à la fois droit et gauche en une seule opération, grâce au système de lecture de codes barre et de libération des gabarits.

MITSUBISHI PLK SERIES ELECTRONIC CONTROLLED PATTERN SEWING MACHINES

PLK-G6030

This computerized pattern stitching machine is one of the largest size machines Mitsubishi can offer: 600 x 300 mm. This size makes it possible to do both a left and right upper at the same time, while the operator is loading the jigs and therefore is saving time and creates more output in your production. The machine is fitted with the well-known PLK touch panel and therefore patterns can be made and /or modified on the machine itself, or on a computer using PTN-GX software. Due to the large size working area and the additional in- and outputs, this machine can be used in many different industries like shoes, bags, safety belts, automotive ,etc.

Esta máquina de pespunte computerizado es una de las maquinas más grandes que Mitsubishi ofrece: 600 x 300 mm. Con este tamaño es posible de hacer los dos partes superiores, izquierda y derecha en una carga del bastidor al mismo tiempo que el operador esta cargando el otro bastidor por eso se ahorra tiempo y aumenta la producción. La máquina esta equipada con el bien conocido panel táctil y así los patrones puedan ser hecho o modificado en la máquina misma o en la computadora empleando el software PTN-GX. Debido al grande tamaño del campo y las entradas y salidas adicionales, la máquina se presta para muchas diferentes industrias como el calzado, bolsos, cinturones de seguridad, industria del automóvil, etc.

Dieser elektronische Nähautomat ist einer der größten im Mitsubishi Angebot mit einem Nähhfeld von 600 x 300 mm. Durch diese Größe ist es möglich den rechten und den linken Schaft gleichzeitig zu nähen, während die Nähern den nächsten Rahmen bestickt, was viel Zeit spart und die Produktivität extrem verbessert. Die Maschine ist mit dem bekannten PLK Touch Bedienfeld ausgestattet, womit Sie Muster sowohl direkt an der Maschine erstellen bzw. abändern können, als auch an einem PC über die PTN-GX Software. Durch das große Nähhfeld und die zusätzlichen Ein- und Ausgänge findet die Maschine in verschiedenen Industriezweigen, wie zB der Schuh – Taschen- Sicherheitsgurt - oder Automotivindustrie Anwendung.

Cette automate de couture est l'une des machines avec les plus grandes dimensions que Mitsubishi peut offrir :600 x 300 mm. Cette dimension permet de faire les deux tiges droite et gauche en même temps, pendant que l'opérateur charge le gabarit, et il gagne donc du temps et augmente votre production. La machine est équipée avec le fameux écran tactile PLK et par conséquent les programmes peuvent être faits et/ou modifiés sur la machine elle-même, ou sur un ordinateur équipé du logiciel PTN-GX. En raison de la grande taille du champ de travail et les apports et production supplémentaires, cette machine peut être utilisée dans beaucoup d'industries différentes, telles que les chaussures, les sacs, les ceintures de sécurité, l'automobile, etc.

PLK-G1010

This small area computerized stitching machine is ideal for single operation applications and is available in both pneumatic and electric version. The machine can be easily adopted for different shoe operations like: label stitching, tongue stitching, throat stitching and quarter stitching. The machine is fitted with the PLK-G control system and gives the user every possibility to modify the patterns on the touch screen.

Esta máquina de pespunte computerizado, de campo chico es ideal para aplicaciones de operaciones singulares y es disponible en 2 versiones :neumático y eléctrico. La máquina se adopta fácilmente a diferentes operaciones en el calzado como : aplicar etiquetas, pespunte en la lengua, costura de garganta y costura de la apertura del zapato y costura trasera. La máquina esta equipada con el sistema de control PLK-G y ofrece todas las posibilidades de modificar la costura a través de la pantalla.

Dieser elektronische Kleinfeldautomat ist ideal für einfache Anwendungen und ist in pneumatischer- sowie elektromagnetischer Ausführung erhältlich. Die Maschine kann sehr einfach auf verschiedene Anwendungen bei der Schuhproduktion angepasst werden wie zB: Etiketten aufnähen, Zunge annähen oder Quatier - bzw. Taschen Vernähen. Die Maschine ist mit dem PLK-G Steuerungssystem ausgerüstet. Dieses macht es möglich alle Muster einfach auf dem touch screen zu verändern.

Cette automate de couture petit champ est idéal pour des applications d'opération unique, et est disponible en version pneumatique et électrique. Cette machine peut facilement être adaptée pour différentes opérations chaussure : couture d'étiquettes, couture de languettes, couture d'empeigne et couture de quartier. Cette machine est équipée avec le système de contrôle PLK-G et donne la possibilité à l'utilisateur de modifier les programmes sur l'écran tactile.

Global SK Series SPECIAL LEATHER SKIVING / CUTTING MACHINES

SK-109

This machine is designed for edge trimming of various injection moulded vamp, sole- and shoe lining. Suitable for trimming the front part and lining the shoes. Trimming of the rough edge of shoe sole, such as the rubber, plastic, PU shoe sole. It is widely used for riding boots and sandals.

La máquina esta diseñada para recortar los cantos de varias cajas de inyección, suela y foros de zapato. Apropiada para recortar la parte delantera y foros de zapato. Recortar el borde áspero de la suela, como caucho, plastico y suela PU. Se utiliza ampliamente para botas para montar caballo y sandalias.

Diese Maschine wurde entwickelt für das Beschneiden von verschiedenen Spritzformsohlen, Schuhsohlen, Schuhfutter und Schuhoberleder. Es lassen sich harte Kanten von Schuhsohlen, wie Gummi, Plastic, PU-Sohlen versäubern. Sie wird außerdem für Reitstiefel und Sandalen verwendet.

Cette machine est utilisée pour rafraîchir le bord de chaussures injecté, semelle et doublures de chaussures. Utilisable pour rafraîchir la partie avant et la doublure des chaussures. Finition du bord de la semelle des chaussures, en caoutchouc, plastique, semelle de chaussure en PU. Ce matériel est largement utilisé pour les bottes et sandales.

SK-111

This skiving machine is suitable to scrape all kinds of leather products for shoes, bags and belts. Max. skiving width up to 50 mm.

Esta máquina de rebajar esta preparado para rebajar en cualquier tipo de cuero para productos como el calzado, bolsos y cinturones. Ancho de rebajar máximo 50 mm.

Diese Schärfmaschine ist geeignet für alle Lederprodukten wie Schuhe, Taschen und Gürtel. Maximale Schärfbreite bis 50 mm.

Global CF 988 THERMO EDGE FOLDING MACHINE

This machine is a good choice for production of shoes and other leather products. This machine is used to fold and at the same time cement the edge of leather goods, and other material of similar nature. The operator guides the piece against the guide and under the creaser foot. This foot holds the material and spreads the cement. Three speed rates are possible: for straight edges, internal and external curves.

Esta máquina es una buena elección para la producción de zapato y otra artículos de cuero. La máquina se aplica para doblar y al mismo tiempo pegar el borde en todo tipo de artículos de cuero y otras material de naturaleza similar. El operador conduce el material contra la guía y abajo el pie. El pie mantiene el material y difunde el pegamento. Con posibilidad de tres grados de velocidad: para doblar en recto, doblar con curvas internas y externas.

Esta maquina é uma boa opção para produção de sapatos e outros artigos em pele e sintético. Esta maquina é usada para orlar materiais de pele e sintéticos. O operador encosta o material ao guia debaixo do calcador e este por sua vez vai segurar o material e este vai deitar a cola no material. É possível regular independentemente as velocidades em reta, curva interior e curva exterior.

GLOBAL

HO HSING Servo motors

As the main European distributor of Ho Hsing motors, Global supplies customers not only with a state of the art motor for every brand of sewing machine, but also with the service customers need to have maximum performance from their sewing machines. With our own Ho Hsing department, Global can guarantee full after sales support, repair and provide you with all the information you need about the latest Ho Hsing technologies and updates.

G series:

To meet the demand for a cheap, high quality **energy saving** motor with needle positioning, Ho Hsing introduced the G series that is sold all over the world for many years now. With a wide range of parameters the G series can be set to drive your machine perfectly.

Available G series models:

G40: 400 Watt motor body for high speed lockstitch, overlock, blind stitch and normal interlock.

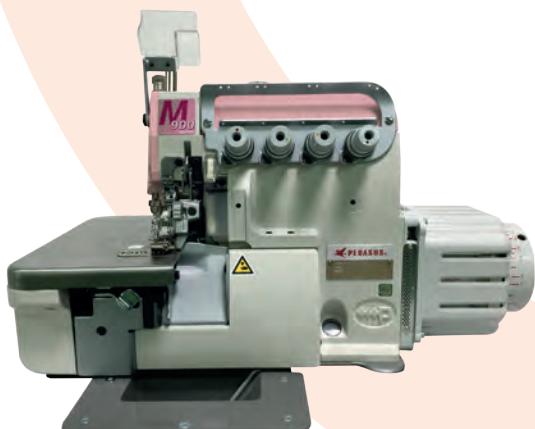

G60-1: 600 Watt motor body, because of the relative high torque the G-60 can be used on some heavier machines like light to medium weight walking foot machines.

G60-2: same as above only with output for PNEUMATIC presser foot lifter and needle cooling (motor run signal).

External synchro 700-1 comes as an option. G series can work with or without external synchroniser and there is no need to change any settings for this, the control box will automatically detect the external synchro and adjust itself.

Model	Power	Voltage (1 phase)	Standard motor pulley	PFL (air only)	NCL
G40-1-00-220	400 W	220 – 240 V	90 mm.	-	-
G60-1-00-220	600 W	220 – 240 V	65 mm.	-	-
G60-2-GL-220	600 W	220 – 240 V	65 mm.	✓	✓

GD40 direct drive set for several models of Juki, Pegasus, Yamato overlock sewing machines:

For less vibrations and smoother running of your overlock machine, a direct drive mini motor is mounted directly on the drive shaft of your overlock machine. A separate GD40 control box is mounted under the table. A special bracket that matches your machine model is included in the set.

iisewing

GLOBAL

HO HSING Servo motors

MH series:

To replace the successful MA series, the powerful 600 Watt MH series ensures high performance on your light or medium weight lockstitch, overlock or interlock applications. Suitable for many automatic machines with reverse, trimming, wiping, tension release and presser foot lift.

Unlike the MA series, on MH series all settings can also be made on the control box, therefore, C200M operating panel is optional.

Available models: Brother, Juki and Mitsubishi.

i90 series:

This motor needs no further introduction, with its high torque and solid motor body i90M series supersedes the world wide famous HVP-90 series and is suitable to drive even heavy duty machines like Dürkopp Adler 204. With its great variety of functions it can be used on a wide range of special sewing machine applications.

Available models in 550 Watt: Brother, Juki and Mitsubishi

Available models in 750 Watt: Dürkopp Adler and Mitsubishi

GM60-5-GL-220

A simple, small and low cost control box with 600 Watt mini motor and external synchroniser together as a set in one carton box. Available functions: needle positioning, trimming (magnet or pneumatic), tension release (only pneumatic), presser foot lift (only pneumatic) and needle cooling function. Safety switch input available. Can be used on interlock with under bed trimmer and light to medium weight walking foot applications. A separate speed control unit is supplied which is convenient for long arm machines.

iisewing

GLOBAL

HO HSING Servo motors

i60 and i70 series:

Separate control box that can be used in combination with a 500, 600 or 750 Watt mini motor. By choosing the correct mini motor for your sewing machine application a wide variety of sewing machine models can be equipped with this control unit (including direct drive).

Operating panel C-200 (i60) or C300 (i70) is optional.

Available functions (depending on the control box model): trimmer, wiper, tension release, presser foot lift, reverse, HP function, second stitch length, puller, material guide, photocell input and flip flop function.

i60 and i70 models use a separate speed control unit that can be installed in a random position under the table, therefore very convenient for long arm machines.

Available i60 models: Dürkopp Adler (Global LP 2970 AUT series), Brother, Juki, Mitsubishi and Pegasus.

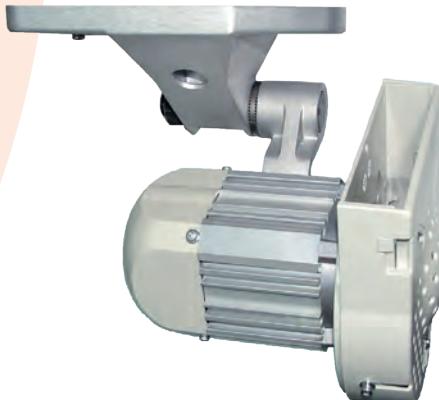

Available i70 models: Dürkopp Adler (i70L) , Brother, Mitsubishi, Juki (i70M)

Mini motors for i60, i70 series:

i60 and i70 series work in combination with a separate mini motor. With the 500, 600 and 750 Watt models a wide range of sewing applications is covered. The mini motors for under the table are supplied including mounting bracket, V-belt cover and motor pulley.

Also a variety of **direct drive** models are available.

Accessories:

AC0001 - photocell NPN – adjustable sensitivity, LIGHT ON or DARK ON selectable.

AC0002 - standing operation pedal SOP-6H3 for Ho Hsing motor (6-pin plug incl. adapter cable for i70 series)

AC0003 - standing operation pedal SOP-8G for G series (4-pin plug)

AC0004 - synchronizer adapter set 1180-2

Contact **Global** for prices or technical information of the Ho Hsing motor. Our Ho Hsing product manager Mr. Martin de Louw will gladly help you to select the perfect motor for your sewing machine application

Spare parts for the **Global Selection**

GLOBAL PARTS

We at Global Parts are specialised in spare parts for the Global line of machines. At our modern operation facility we give our customers the best possible service. We are very proud of our 90% 'off-the-shelf' delivery of Global spare parts, because of our large inventory.
