INDUSTRIAL SEWING MACHINES

## Global BM 9000-DD Series

VARIOUS BLINDSTITCH MACHINES FOR LIGHT TO MEDIUM MATERIALS

### Global® BM 9280-DD Blindstitch machine

With this high speed blindstitch machine the waistband linings are attached on european-style trousers (blindstitch seam lies on top of the waistband seam). Due to the spring-loaded presser foot, this machine overcomes the change of thickness free of marks (p.e. at cross seams, pocket bags).

### Global® BM 9260-DD Belt loop machine

The fabric is first cut to size by two knives, then passes through a folder and sewn by one thread blindstitch to produce a perfect 10 mm double belt loop, suited to classic men's and women's wear.

non skip  
1:1

### Global® BM 9352-DD Double plunger machine

For medium to heavy materials with two spring-loaded plungers. When sewing over cross seams, automatically spring down so that the needle pierces the upper cloth layer only. The two presser feet shoes act like a scanner and are adjustable to the thickness of the fabric.
