

Global LF 2381-AUT

HIGH SPEED FLATBED MACHINE

High speed single needle flatbed machine. All electric and fully automatic with three stepmotors, driving the wheel feed, needle feed and top roller presser. The stitch is set electronically which makes the stitch length and reverse precise, stitch in stitch and of the highest quality.

Programmable differential feed (+/- 1,0mm) for top and bottom feed. Up to 99 programs can be made, stored and transferred from machine to machine via USB/

Other features include (all electric):

- Thread trimmer
- Presserfootlifter
- Backtack
